AITU

Investment opportunity

AI Internet Technology University

Scale BASE. Elevate human capability. Transform the nation from consumers to creators.

FROM AI TOOLS

BASE

Patented technology
Platform + services

TO USEFUL PRODUCTS

Education / Business

Turn AI tools into *useful products*

Scale BASE and conversational AI products to improve education quality and business efficiency.

GPT and other AI tools are just tools. AITU offers patented technology, a platform and services to put them to work.

The ambition: elevate human capability—from consumers to builders and creators.

CONVERSATIONAL ADAPTIVE LEARNING

Learning is construction, not retrieval.

Apply knowledge

Create something new

Build understanding

U.S. PATENT

10,956,676

Development factory

PROTECTIVE ASSET

Behind the BASE platform
Not a patent-sale investment

Patent as protection

A registered patent is a tangible protective asset behind BASE. It is owned by the inventor as personal property.

U.S. 10,956,676

“Development factory” protects the BASE platform.

Implemented as BASE

Scales Development Factory into open-world collaboration of conversational AI agents.

Protection—not sale proceeds

This offer includes no proceeds from any patent sale or license.

BASE +
demo seeds

Small demos are seeds to grow into useful products.

Connect AI to specific data to develop useful products.

BASE implements Development Factory for conversational AI collaboration, with an open API for other developers.

Subscription-led business model

PRO · $9/month

BASIC features + name on the professionals list.
